

Limited Warranty

All of the stile and rail doors manufactured by Summit Woodworking meet or exceed Industry standards and are warranted for one year from the date of shipment unless otherwise stated. We do not warranty French doors that are more than 7 feet in height or more than 3 feet in width against bowing or warpage unless specifically stated in a quotation to you.

Each of our doors has been inspected before shipment and we have determined them to be free of defects which would cause the door to be unfit for its intended use.

Upon receipt of one or more of our doors, it is recommended that you inspect the door or doors as soon as possible. You should be checking:

- 1.) for the possibility of freight damage.
- 2.) to verify that you received what you ordered.
- 3.) that each door is flat and straight and has no defects.

If there is freight damage, please see the freight section of this catalog -*Terms of Sale and General Information*.

If a door is determined by you or your customer to be defective, we must be notified as soon as possible. Upon written notification of the defect and/or after inspection by our factory representative, we will at our option:

- 1.) repair the door or;
- 2.) provide a replacement part or parts for repair of the door or;
- 3.) provide a replacement door.

A replacement door or part will be as originally purchased from Summit Woodworking and ***specifically does not include freight or finishing or installation charges***. It is understood that if a door or doors are found to be defective when a shipment is received, ***written notice must be sent to Summit Woodworking within 30 days after receipt of the doors and before any hanging, fitting, or finishing charges have been incurred***.
